

## Finishing Belts

### Features & Benefits

#### ALY Belts

- Aluminium Oxide - red in colour. Ideally suited to the preparation of Carbon Steel Substrates

### Features & Benefits

#### ZLY Belts

- Zirconium - blue in colour. Ideally suited to the preparation of Stainless Steel. This is a high performance, tough, sharp belt. Due to this belts superior properties, it is capable of removing large amounts of material in a single pass

Rollertech recommendations are to use 24 grit for the preparation of rubber covered rollers. However, due to the roll activators capabilities, we offer a full range of grit sizes. These custom belts and finishes are available on request.

Rollertech offer from stock. Belts that fit our roll activators. Please enquire if you require different sizes.
