

Thermo Cutting Blades

Features & Benefits

As with all Rollertech products, our thermo cutters have been developed with the working environment in mind. They offer a number of benefits to the rubber roller manufacturing industry:

- Cuts both rubber and urethane
- Fast and efficient - 1" x 0.5" strip can be cut at a rate of 35 ft/min
- Uses less than 10% of the energy consumed in grinding
- Incredibly safe in comparison with rough grinding
- Quiet operation without smoke or dust
- Minimises thermal shocks and distortions of elastomer
- Easily adaptable to lathes, grinders or CNC machines
- Enables grooving
- Efficiently removes excess rubber prior to final grinding
- Tools are easy to mount and sharpen, custom tools available
