

Knife Heater MH26500 & Knives

Efficient cutting

Our heated knives are designed especially for the rubber manufacturing industry. They allow you to cut through rubber quickly, easily and, more importantly, safely.

Features & Benefits

- A heated knife, in effect, softens the rubber at the point of contact. This allows the operator to cut through the rubber with greater ease and accuracy
- As less force is required, it reduces the risk of the knife slipping and damaging the rubber or injuring the operator
- Heated knives also allow operators to cut through rubber much quicker, increasing the speed of the production process

Technical Specification

- 220/240 volts
- Single Phase
- Variable temperature up to a maximum of 750^o Fahrenheit /400^oC
- Length of unit 304mm
- Depth of unit 177mm
- Width of unit 171mm
- Length of oven 210mm
- Width of oven 89mm
- Height of oven 16mm
- Holds up to 6 knives.
- Knives, 203mm long (Blade)
